Karnataka, India

Summary

I'm a passionate Software Engineer with experience in Backend Development, API Development, Full Stack Development, and Data Engineering. I work on designing and implementing APIs, data retrieval systems, data transfer workflows, analytics solutions, and scalable backend services using Python, Node.js, PostgreSQL, ClickHouse, and React. I enjoy solving real-world problems by building efficient systems, optimizing data flow, and creating maintainable, scalable applications. Currently exploring advanced concepts in Data Engineering, Analytics, and System Design. Let's connect!

Experience

Saranyu Technologies

1 year 1 month

Software Engineering Trainee

September 2025 - Present (10 months)

Bengaluru South

Engineered Scalable Backend Systems & High-Performance APIs using Node.js, enabling secure, modular, and production-ready applications

Designed and Implemented End-to-End Data & Analytics Platforms, including ETL pipelines, data models, and real-time KPI tracking for user behavior, revenue, and growth

Built Advanced Analytics Infrastructure using ClickHouse & Redis, delivering high-speed query performance, user funnels (DAU/MAU), and multi-dimensional insights

Architected Multi-Tenant Systems with PostgreSQL & Prisma, incorporating dynamic filtering, secure access control, and flexible data segmentation

Optimized System Performance and Reliability by refactoring monolithic codebases, enhancing data pipelines, and developing Python scripts for data generation & robust error handling (achieving up to 10x query speed improvements)

Developed Responsive and High-Performance Frontend Applications using React, implementing reusable components, state management, and seamless API integration to deliver intuitive, data-driven user interfaces

Software Engineer Intern

June 2025 - September 2025 (4 months)

Bengaluru, Karnataka, India

Engineered Scalable Backend Systems & High-Performance APIs using Node.js, enabling secure, modular, and production-ready applications

Designed and Implemented End-to-End Data & Analytics Platforms, including ETL pipelines, data models, and real-time KPI tracking for user behavior, revenue, and growth

Built Advanced Analytics Infrastructure using ClickHouse & Redis, delivering high-speed query performance, user funnels (DAU/MAU), and multi-dimensional insights

Architected Multi-Tenant Systems with PostgreSQL & Prisma, incorporating dynamic filtering, secure access control, and flexible data segmentation

Optimized System Performance and Reliability by Refactoring Monolithic Codebases, Enhancing Data Pipelines, and Developing Python Scripts for Data Generation & Robust Error Handling (achieving up to 10x query speed improvements)

Nagarjuna College Of Engineering and Technology Intern

December 2024 - June 2025 (7 months)

Devanahalli, Karnataka, India

I worked as a Coding Intern, teaching problem-solving skills and helping others think analytically in programming. I'm passionate about guiding learners to approach challenges in a clear and structured way.

As a Tech Intern – Coding Instructor, I teach junior students programming and problem-solving. To stay sharp, I keep learning too!

I've completed 85% of my Competitive Coding Course, covering Recursion, Sorting, Bit Manipulation, Stacks, Queues, and Linked Lists.

Mutual fund office chikkabalapur

E service operator

January 2022 - June 2025 (3 years 6 months)

Chikkaballapura, Karnataka, India

ai4sees private ltd

Data Science Intern

November 2024 - January 2025 (3 months)

Bengaluru, Karnataka, India

Excited to share that I've joined an internship in Data Science! Looking forward to applying my skills and gaining valuable hands-on experience in this dynamic field.

I have successfully created real-time multi-variate time series data for laptop performance metrics. I have worked on methods to manipulate and visualize these datasets, as well as techniques to identify anomalies in the data.

Education

Nagarjuna College Of Engineering and Technology

Bachelor of Engineering - BE, Computer Science · (January 2021 - May 2025)

Poornaprajna PU College

Pre-University College · (May 2019 - September 2021)

Poornaprajna Educational Institution

SSLC · (May 2010 - May 2019)
